EDMONTON BULLETIN, JULY 88, 1884.

#### THE C. P. D.

Taking for its text the amount and the C. P. R. Company were gold to run only two trains a week west of the two trains as week west of the two trains as serion on the injustive of the tell washes a sermon on the injustive of the tell government compelling the syndicals of complete its line through to the Peads of the present route, in such a short time instead of allowing it to cover the North-West with a net work of branch lines. The order to decrease the train service has since been countermanded, although the reason of its laving been given—lack of train—still serious. But the argument advanced by the Free Frees, as it advocates a sweeping change of policy, is well worth discussion.

Circumstances have occurred that have rendered apologists of the federal government in the North-West few and farbetween, but, for all that, and the control of the control

The Free Press—or the syndhole through the medium of the Free Press—carist the 255,00,000 to be made a gif and work to be stopped on the through the so that branches may be built through the so that the syndhole of the press. The saked that the county desirable above. This is asked that the county desirable objects. These objects would both have heat attained had the government policy been excited the objects would be the press of the first taken by the Yellowbach pass, without the aid of the great has which it now appears is a millistone round the tock of the company as well as around the tock of the people of Chauda. With such that the wide in the sound of the track, and the first taken of the track, and the followed it as it was built, and would have followed it as it was built, and specially out on each side, have provided Population and wealthfor an empire without a fulle of branch lines. So, to when the mountains were reached, with no heavy workers of the measure of the said of concessions, and the colorisation of the said of concessions, and the colorisation of the made for extra funds and concessions, and the colorisation of the

and would not have lost confidence in the addition of the projectors and the feasibility of the scheme, as they certainly have at

offsat the syndicate has done, it has done it is own accord, in the face of light and according to the face of light and according to the face of light and the syndicate of the face of light and careless though they be will accord that branch lines may be built, if work in the mountains has to be shopped in order that branch lines may be built, if work in the mountains has to be shopped in order that the syndicate may not become bank-rupt, by all means let it become bankrupt forthwith. A company who were given an empire for running a railroad through its, who were paid the cost of the road in consideration of their running it, who recaived svery concession they desired, merely for the asking, and yet fall simply through the way for the syndicate of the cost of the road in consideration of their running it, who recaived svery concession they desired, merely for the asking, and yet fall simply through the strength of the country they compited at the ladder their bargain, deserve nothing a for halder of the country they compited at the ladder of the country they compited as the ladder of the country they compited their bargain, deserve nothing as and the final closing of the books.

When the men who compose the syndicate when the men who compose are syndroste in their individual capacities as stock grun-blers or members of any mercan-tile calling or profession, fall to complete a bargain entered into-in fact fail-their creditors take possession of their effects and realize upon them as soon as may be, there remize upon them as soon as may be, there is no reason that when the mortigage now held by the government against the same men in their capacity as members of the syndicate should not, if default is made, be syndicate should not, if default is made, be foreclosed and possession awarded in the same away. The cry that the welfare of Ca nala is bound up in the prosperity of Ca company—so national in its character—is a feeble one. The work is national more fit-tive company, and there is national more fit-ting than that the company which more is as an impositioned between the nation and its work should be done away with as quickly as possible. Had as those who now administer possible. Bad as those who now administer possible. Had as those who now administer the affairs of Canada are or may be, they have yet to be accused of failing in their agreements, and making away with millions of the public funds without the scratch of a pen to show where the millions went to. By all means let national works be under un-tional control, so that if the works are not ocuted, or the enterprises carried out, people will only have themselves to ue, and in any case they will know where the funds which they have contributed have gone to. Under responsible government, as the people is so is the government, and so are any companies formed by them. It is not to be expected that a corrupt government will bring forth an honorable company, but rather if the government is bad the pany will be worse, being removed entirely beyond the control of the people. If the government of Canada is so dishonest and in capable as not to be fit to be trusted with capable as not to be fit to be trusted with the carrying on of such a great work as the C. P. R., so also must be any company that may be organised by them, as is the C. P. R. Co. Matters have arrived at such a pitch now that nothing remains but national ruin through the syndicate or national countrol of through the syndicate or national control of the syndicate, or its work.

Scarcely enough members were present at the opening of the North-West council to form a quorum. Two new members have been elected, one from the stock district of Cajary and one from Moose Mountain. The lieutenant-governor's speech was a lengthy one and contained a number of statement and measures of importance. Politions for incorporation from several municipalities are to be laid before the council, also some applications for the establishment of herd districts. The ordinances respecting auctionsers, licensing billiard tables, marking stock, and receivation of prairie free, are to be submitted to the statement of the statement

persons killed by accident, and concerning registration of titles, are to be submitted. A new school ordinance will also receive attention. It will be based on the bill introduced tion. It will be based on the bill introduced by Mr. Oliver last session. The necessity for this ordinance is imperative, owing to the rapid increase in the population of the terri-tories, and the governor should have laid special stress on it, instead of simply to laid special stress on it, instead of simply to hope the council would be able to pass it. The liquor permit business came in for a goodly share of talk, the gist of which is that the permit system is a failbre and illicit manufacture is carried on largely. mits to professional men to be dispensed in small quantities only. He thinks the only results obtainable by that form of permit would be to increase the business of a few medical men, and to cause a large immigration of such to the territories, and also the brewery question comes in for a small dose of the speech. His honor is in favor of es-tablishing breweries in the thickly settled districts as a means of stopping illicit distilling and lessening the amount of smuggling The general government is to be asked to deal with the permit system to render the working of it more effective. His honor congratulated the council on the prospect of a ountiful harvest and the general feeling of honefulness throughout the country. The wilderness of Assinibola gets patted on

o if it was the only part of the terries worth noticing, instead of being the only portion which, in the natural course of events, would be the last to be settled. According to his henor the agents of the government and the C. P. R. have not misrepresented that district, the press of Canada to the contrary notwithstanding. The planting, thereby changing the aspect of the prairie sections, is timely and one which commends itself particularly to the district of Assinibola. Agricultural societies are to receive, at last, the attention they, at least, Of course, the initiative taken by the Assinibola society, which is, as vet, in its infancy. The general impression is that the initiative has been taken by sois that the initiative has been taken by so-cleties in the farming districts of the terri-tories before the Assimbola desert concern was thought of. The unfortunate Indians do not escape his honor's notice, and the blance for the so-called exaggerated reports of their for the so-called exaggerated reports of their troubles is laid, as usual, at the doors of the newspapers. From his honors point of view, the Indians are contented and progressing wonderfully in agricultural pursuits. He admits there might be a little trouble and even excitement (may be there is a difference), but the general teeling is one of security and there is no cause for alarm.
